

## COMMODORE'S NOTE

Pat & Joy Howard entertained us with photos and stories of their Loop trip in 2023-2024. They did a great job that "took us with them" on their trip. There were "ups and downs" to the trip (a pun when thinking about all the locks), and it took them a year. Yet, they are very glad they did it. Some of us have thought about doing it, but knew we never would be able to. So, thanks Pat & Joy, for taking us vicariously.

## SPEAKERS

Monday, October 13, Sarah Jones, the Executive Director of the Tybee Island Historical Society is returning to speak to us about Tybee Island. She spoke about the lighthouse the last time she was with us.

Saturday, November 8, Change of Watch at the Savannah Country Club.

Monday, December 8, Christmas Party at Marsh Harbor Clubhouse.

## CRUISES

The "After Labor Day Cruise" to Beaufort, Sept. 5-7, was well attended. I didn't get there until Saturday due to a funeral, so I missed the meal with everyone Friday night at Panini's and brunch at the pavilion Saturday morning. But I heard that everyone had a good time - and that there was a ton of food for the brunch.

Tommy and I drove to Lady's Island Dockside Saturday night for supper since we had my car, and stayed on the boat that night. We stayed so that we could leave our boat at Marsh Harbor Boat Works the next day to get the bottom painted. We got it back the next Wednesday and they did a good job. (Tommy was so pitiful those few days without *Obedience*.)

## MEETINGS:

**Every second Monday of the month at Carey Hilliard's,  
3316 Skidaway Rd.  
Order dinner at 6:00;  
meeting at 7:00.**

## SAILING EVENTS

This weekend, Sept. 27-28, is the Oktoberfest Regatta! To register, please go to <https://www.regattanetwork.com/event/30322>.

This is a two-day regatta on the Wilmington River/Wassaw Sound.

First horn is at 11 a.m. on Saturday and 10 a.m. on Sunday. Finish by 5 p.m. on Saturday and 3 p.m. on Sunday.

Dinner Banquet is Saturday evening at Young's Marina.

There will be PHRF classes for Spinnaker, Non-spin, and Cruising.

The McIntosh Cup has been moved from October to November 8-9. November 15 is the Frostbite Series Race #1.

-Angela Margolit, Race Chair

\*\*\*\*\*

This was actually included in something from China. As I recall, it was in my own purchase.

### **PRODUCTION INTRODUCTION**

Our honorable customers, we are very grateful to you for your buying and using the electricity-saved box. We are sure our product will bring many conveniences and comfort to your life. Electric power is an essential part of our modern life. We can not tolerate the electric power resources being wasted without results from the economical beginning of a little after a period of time, the expenditure lesson obviously. Saving electricity means saving money, saving money means earning money! Joices surge forward you at heart, do not forget, the electricity-saved box brings you happiness! When power supply transporting, for supplying, in order to avoid the wastage and the low voltage of terminal users in the peak time, so would transport with higher electricity press, for this reason the electric voltage for actual bearing of the users will higher than the settled electric voltage of the equipment. The superfluous electric voltage can not only let the loading equipment works more efficiently, on the contrary is the main cause of leading to the equipment fever. As a result, it causes the negative effect.

The amount of electricity wastage and the expenditure of electricity charge increase greatly and the lifespan of the electric appliances shortens etc. the basic speculation of the electricity-saved box is to let the customer have the stable work electric voltage and the prolong the lifespan of using the electric appliances.

To offer the accurate and stable work electric voltage for loading, promote the quality of the power supply. Reducing the electric appliances getting fever prolonging the lifespan of the electric appliances, reducing the maintain cost. Promoting the power factor, can save the fee of adjusting the interest rate of the power supply, for the mobile electricity charges can also attain the significant effect that lower To increase the capacity of using the system equipment can retard the pressure of the switch or circuit convenient installing and using. Save electricity, save money for customers every minute every second after installing.

### **GUIDE TO USE:**

Plug the electricity saved box in to any sockets at home. According to the electric appliances quantity and loading carry can use one or several stanzas electric appliances, can immediately attain the electricity-saved effect.

Simple operation, no need maintenance, no need pay attention. After installing, however develop the effect.
